Singtel Telecommunications, Ltd.

31 Exeter Road, Comcentre

Singapore 239732, Republic of Singapore

Dear Hiring Manager,

I am 3rd Information Systems student at the National University of Singapore, and I am writing to express my interest in the internship position at Singtel, especially in Software Development roles. I have read about the recent integration of Zoom into Singtel's CPaaS to provide a more engaging customer experience and promote digital transformation. Such innovation is why I want to join Singtel.

In my study of Information Systems, I have accumulated a solid knowledge base in system architecture, enterprise systems, and system development life cycles. It is the high-level compass for my further pursuit of software development techniques, focusing on full-stack development and mobile technology. I have built numerous personal projects with different tools & technologies and developed a basis for the industry's best practices & solutions.

I identify as a highly motivated and curious individual. I continuously reinforce my knowledge in Computer Science areas; and expand my understanding of programming languages, security, networking, etc., the foundation of the modern computer system while keeping up with the latest news in the industry and academia.

Singtel's values and incredible commitment to fostering technologies for the better inspire me; and I am very excited to be part of your organization. Thank you very much for considering my application.

Sincerely,

Le Van Minh
