IS4301 Agile IT with DevOps – Tutorial 4

Adjunct Professor Foong Sew Bun

Department of Information Systems and Analytics

National University of Singapore

Scope of Tutorial 4: Sprint Planning and Develop More User Stories

In this tutorial session:

- Perform standup ceremony facilitated by scrum master (10mins)
  - Stand around in a ring
  - Each team member takes turn to describe briefly:
    - What he/she had completed last week?
    - What he/she intends to work on this week?
    - What are lessons learnt or obstacles team members need to be aware of?
- Conduct Sprint Planning for Sprint Cycle #1
  - Product Owner leads the sprint planning by first stating the goal for Sprint Cycle 1
  - Examine product backlog and selects user stories from backlog with prioritization with squad members
  - Discuss and assign user stories, tasks for the sprint cycle.
  - Team velocity will only be known after a few sprint cycles.
- Team continues to develop more user stories.
